

\$\$ HEATING BILL CREDIT \$\$

Heat Pump Offer

Earn a *Bill Credit* by installing a heat pump heating and cooling system at your home or business from *April 1st* to *Labor Day* of 2015.

- ➔ Both *geothermal* and *air source* heat pumps qualify
- ➔ New installations and replacements qualify
- ➔ EnergyStar® rating or higher are needed to qualify
- ➔ *Geothermal Heat Pump* bill credits are 5,000 KWhs per ton of installed capacity
- ➔ *Air Source Heat Pump* bill credits are 3,000 KWhs per ton of installed capacity

Get Both Heating and Cooling with a Heat Pump

Because a heat pump can remove heat from a building in the summer and also supply heat for a building in the winter, heat pumps are an excellent fit for all of your heating and cooling needs. Attractive rates, financing and unbeatable efficiencies make a heat pump the right choice for you. Take advantage of a limited time offer of credit on your electric bill for the installation of a heat pump system. Not only can you increase heating efficiency, you can save on your heating and cooling bills.

- 10 ton residential maximum
- 20 ton commercial maximum
- Equipment must be placed in service between *April 1st* and *Labor Day* of 2015
